

AKSA ARMS has long been well known by its innovative items in the field.

What is new this year?

1. T-12: this is a unique design shotgun which is based on AR .308 platform but chambered in 12 ga. So, people could enjoy using an AR .308 as shotgun. This gun is sized in international AR. 308 so 80% of the parts are compatible with an AR .308 as well as upper component can easily be installed onto a AR . 308
2. T- 14: this is another unique design which is based on AR 15 platform but chambered in .410 ga. (36 ga.) . This has the exact same look as in AR 15. and parts are compatible with AR 15 as well

We are looking forward to finding is that we would like to be represented by professional business men throughout the world. So, we are looking forward to meeting people who might have somehow interest towards our items. Please email us at export@aksaarms.com for any further inquiry at any time
