

Naturalis®

hunting bullets and cartridges

November, 2015

PRESS RELEASE

Lapua has manufactured Naturalis® bullets since 2002 and is now presenting the 3rd generation of the lead-free hunting bullet. The Naturalis hunting bullets and cartridges can be used in hunting areas where lead core bullets are prohibited.

EXTENDED RANGE

The new Naturalis® design uses state of the art technology to produce consistent, controlled expansion. The polymer valve design uses hydraulic force to create the optimum mushrooming effect at the widest velocity range on the market.

WIDE SELECTION

Lapua Naturalis® bullets are available in seven calibers: 6mm, 6.5 mm, 7 mm, .30, 8 mm, .338 and 9.3 mm. Lapua Naturalis® cartridges are available in ten calibers: .243 Win., 6.5x47 Lapua, 6.5x55 SE, 7x64, 7x65R*, .308 Win., .30-06, 8x57 IS, 8x57 IRS, .338 Lapua Magnum and 9.3x62.

**available for hunting season 2016*

A CLEAN SHOT

The mushrooming of bullet starts immediately on impact. The expansion process is started by the valve at the tip of bullet, leading the bullet to expand symmetrically and without fragmentation. This gives a maximal energy transfer to the hunted game, reduces the risk of wounding or lengthened suffering, and minimizes the meat loss.
