

Walkstool - the only three legged stool in the world with telescopic legs, patents and trademark protections.

Walkstool is a unique product. No other stool fulfils all these requirements at the same time: it should stand steadily (three legs), be comfortable to sit on for long periods (big and ergonomically designed seat), last for years and years (quality in every detail).

6 different models, big seat sizes and big feet

Walkstool, fully unfolded, is available in 6 sitting heights from 45 cm to 75 cm. With these models we offer comfort to both short and tall persons as well as thin persons and up to a Japanese sumo wrestler. Do visit us at **stand 4-226** in Scandinavian Village.

Walkstool is a Swedish invention and the only one of its kind in the world. The telescopic legs are made of sturdy aluminium and the seat of high tech material. The telescopic legs make it compact and offers two sitting positions. The weight is only app. 800 g depending of model and the ergonomically shaped high tech seat gives you an outstanding sitting comfort. The Swedish National Testing and Research Institute has tested Walkstool which shows that the strongest model (Walkstool Comfort 65 cm) is capable of being loaded up to app. 425 kg / 935 lbs under perfect conditions.

For further information, please visit our website: www.walkstool.com. Pictures and videos of Walkstool are available at www.walkstool.com/pictures and www.walkstool.com/videos.
