

New Product Announcement

135 gr. HP Varminter™ #2124

Sierra Bullets is proud to introduce a new addition the Varminter™ line. Our new 30 caliber 135 gr HP (#2124) was created specifically for explosive expansion and instant kills on larger varmints and predators. This light weight, thin-jacketed hollow point bullet is devastatingly effective, but requires velocities to remain under 3,200 FPS. For 300 Blackout and reduced recoil loads, this new offering adds another excellent hunting bullet option.

The new 30 caliber 135 gr HP will be available in boxes of 500 bullets (#2124C) with a 2016 suggested retail of \$163.96 per box and boxes of 100 bullet (#2124) with a suggested retail of \$33.59 per box.

 #2124 - 30 Cal 135 gr. Varminter	DIAMETER	WEIGHT	STYLE	SECTIONAL DENSITY	BALLISTIC COEFFICIENT

Founded in California, Sierra Bullets has been dedicated to manufacturing the most accurate bullets in the world since 1947. Since relocating to Sedalia, MO in 1990, Sierra has manufactured a very wide range of bullets for both rifles and pistols. Today, Sierra uses the highest level of precision in design, manufacturing, and quality control standards to produce bullets used for precision target shooting, hunting and defense purposes. Sierra Bullet lines include: BlitzKing, Varminter, GameKing, MatchKing, Tipped-MatchKing, Pro-Hunter, Sports Master, and Tournament Master. Available calibers range from .204 through to .500.
