

HEAVY DUTY FOOT WEAR

HUNTING

EVERYDAY HERO

Work offers challenges along with harsh conditions and even accidents - untamed nature, heavy-duty facilities, and hazardous areas are all hostile environments for a gentle, unprotected human foot. Under such conditions each day poses countless conflicts between the vulnerable nature of a foot and the demanding forces surrounding it. ALPINA develops shoes that intervene in these conflicts as an ever-present, flexible, and caring force with one mission to accomplish: To help get the work done while keeping feet safe and satisfied.

WORK AND SAFETY

BODYGUARD

Work offers challenges along with harsh conditions and even accidents - untamed nature, heavy-duty facilities, and hazardous areas are all hostile environments for a gentle, unprotected human foot. Under such conditions each day poses countless conflicts between the vulnerable nature of a foot and the demanding forces surrounding it. ALPINA develops shoes that intervene in these conflicts as an ever-present, flexible, and caring force with one mission to accomplish: To help get the work done while keeping feet safe and satisfied.

MILITARY-TACTICAL

DESIGNED TO PROTECT

Alpina quality – TECHNOLOGY ON A MISSION

Vibram sole (rubber) guaranteeing a steady step on all kind of surface.

Event membrane – waterproof technology provides maximum comfort and keeps footwear dry by venting perspiration vapour through millions of unimpeded microscopic pores engineered into a durable waterproof membrane.

VCP volume control plate allows for precise adaptation of the volume independently for the left and the right foot.

Alpitex membrane is water-resistant and allows good ventilation as well as comfort
