## FOCUSED ON MODULAR SOLUTIONS

### The Tasmanian Tiger-Collection 2016

For the 2016 season, Tasmanian Tiger is focussing on modular solutions in the key collections, in order to tailor military equipment even more precisely to specific and individual requirements.

#### Combat Backpack with Sophisticated Features

Popular combat backpacks have been completely revised and given new, carefully designed detail solutions. The **TT Pathfinder MK II** is now coming with Molle on both sides, which means it can be extended with any TT Pouch or accessory. A large, variable volume compression flap on the front can be used for helmets etc.

#### Lightweight Plate Carrier with Laser Cut Technology

Extensive modular “mix and match” solutions are provided by the waistcoats and strap systems. The range is completed by the lighter **TT Plate Carrier LC** with the laser-cut Molle system.

#### Low Profil Medic Backpack with Adaptable Interior

Tasmanian Tiger presents with the **TT Medic Assault Pack MK II** a flat Medic backpack with intelligent, clearly laid-out interior. The Molle system on the front and side is laser cut. The lightweight padded shoulder straps can be detached and kept in a velcro pocket on the bag, and the rucksack comes with webbing so it can be adapted to a panel carrier or waistcoat. Stowable carrying handles for high-speed transportation in an emergency.

#### Tactical Belts: Flexible and Functional

Tactical belts are being presented in a more flexible sizing system and with more comprehensive features. Such as the **TT Equipment Belt MK II** which comes with a Cobra closure from AustriAlpin.

#### New Tac-Series: Outdoor- and Survival Pack for Multiple Use

The new **TT Tac Pack 45** features the V2 Plus Carrying System and is a member of the new „civil“ line. Within this category you will find products that are made for business and tactical use as well as for private use. The outdoor- and survival backpack can be individually fitted with side pockets, while the detachable hip strap (Warrior Belt) can be used separately as a survival belt. The backpack has a waterproof inner bag with roll-up closure.
