NEW STREAMLIGHT TACTICAL LIGHT BOASTS 2,200 LUMENS

"Dual Fuel" ProTac HL® 4 is Among Brightest Carry Lights Available

Eagleville, PA, January 19, 2016 – Streamlight® Inc., a leading provider of high-performance lighting and weapon light/laser sighting devices, introduced the brightest addition yet to its ProTac® family of lights, the ProTac HL® 4, a high lumen (HL) flashlight that delivers 2,200 lumens of blinding white light. The "dual fuel" light also permits a choice of either 3V CR123A lithium or Streamlight's new 18650 rechargeable lithium ion batteries.

Designed for illuminating an entire area, including what may be obscured along perimeters or in corners, the new model uses the latest in power LED technology. The light offers high, medium and low settings as well as a strobe for signaling or disorienting targets. The light's TEN-TAP® programmable switch allows users to select from high/strobe/low (the factory default); high only; or low/medium/high.

"The ProTac HL 4 is one of the brightest tactical lights on the market today," said Streamlight Vice President, Sales and Marketing, Michael F. Dineen. "It functions like a hand-held floodlight, providing wide, sweeping lighting while also delivering a strong, focused beam. It's the perfect carry light for tactical users when clearing scenes; for outdoor enthusiasts when navigating a dark trail; or for industrial workers when flooding a work area with light. And for added versatility, it permits users to choose from multiple power sources."

On high, it delivers 2,200 lumens, 30,000 candela, a 346-meter beam distance and a run time of up to 1 hour and 45 minutes, depending on the battery source. On low, the light provides 60 lumens, 800 candela, a beam distance of 56 meters, and a run time of up to 43 hours. The run time for the light's strobe is up to 3.5 hours, depending on the battery used.

The ProTac HL 4 is powered by either four included 3V CR123A lithium batteries, with a shelf life of up to 10 years, or two of Streamlight's new Lithium Ion 18650 rechargeable batteries. Streamlight also offers an 18650 Battery Charger that can recharge either one or two batteries simultaneously, and permits charging through either AC/DC or USB power sources.

Fabricated from 6000 series machined aircraft aluminum with an anodized finish, the light features a multi-function, push-button tail switch that permits one-handed operation of momentary, variable intensity or strobe modes. Its "sure grip" rubber sleeve and included lanyard ensure that users will never lose their grip.

The ProTac HL 4 is 8.63 inches in length and weighs one pound, one ounce with CR123 batteries and one pound, two ounces with 18650 batteries. It has an IPX7 rated design for waterproof operation to one meter for 30 minutes, and is impact resistance-tested to one meter.

Available in black, the ProTac HL 4 has an MSRP of \$175.00 and includes Streamlight's Limited Lifetime Warranty.

About Streamlight

Based in Eagleville, PA, Streamlight, Inc. has more than 40 years of experience making tough, durable, long-lasting flashlights designed to serve the specialized needs of professionals and consumers alike.
