## New Kershaw Intellect is a Smart Choice

- Distinctive styling
  - Polished blade and hardware add standout touches
- 

TUALATIN, OREGON— The new Kershaw Intellect is the intelligent choice for style, functionality, and practicality.

The drop-point blade is ideal for a wide range of cutting applications. The blade is built of 8Cr13MoV for good edge retention and easy resharpening. But Kershaw adds a high polish to the blade for an exceedingly classy look, too.

The handle is pure steel with attractive, machined contouring that makes it stand out from the crowd. The polished backspacers and other hardware contrast handsomely with the handle's matte grey titanium carbo-nitride coating and visually tie-in with the polished blade.

Opening is smooth, easy—and entirely ambidextrous—with SpeedSafe® assisted opening and the built-in flipper. A frame lock secures the blade open during use. For a final practical touch, the heavy-duty deep-carry clip is left/right reversible.

Great looks and top performance combine to make the Intellect a very smart choice for a wide range of knife users.
