

## **ArmorSource Launches the ‘Aire’ Version of its Ultra-Lightweight Ballistic Helmet**

**ArmorSource LLC launches its ‘L.J.D Aire’, an advanced ballistic helmet weighing less than 2 pounds, at the SHOT SHOW in Las Vegas**

January 22, 2015  
Las Vegas, NV

ArmorSource LLC of Hebron, Ohio, first awardee selected to manufacture the Light Weight Advanced Combat Helmet (LWACH) for the U.S. DoD, introduces an even lighter helmet than its AS-501 Ultra-lightweight Ballistic Helmet, in Las Vegas.

The Ultra-lightweight “L.J.D Aire” (Aire) helmet is an extraordinary product providing a super lightweight shell with robust ballistic performance that exceeds the U.S. ACH ballistic performance but with a weight reduction of more than 40% for the same coverage area and harness. The complete product in full coverage version, size Large, with a Boltless configuration will weigh only 1.85 lbs. (840 grams) vs. the original ACH equivalent model at 3.3 lbs. (1.5 Kg), delivering the same or greater protection against fragmentation threats. The Aire helmet will be available in Full, Mid or High-cut versions, offering Boltless Side-rails, Boltless Retention, and customers’ choice of Shroud brackets, for Special Operations requirements and Operators.

Like most ArmorSource helmets, the Aire made to match the ACH/MICH geometry, so it conforms to most commercial suspension and retention systems on the market today; to include after-market accessories such as NVG shroud, side-rails, gas masks, ear protection and goggles.

According to Mr. Yoav Kapah, ArmorSource CEO and President, the Aire helmet is part of a new premium line of helmets named after **Lawrence J. Dickson** (L.J.D), one of the founders of ArmorSource, who passed away three years ago. Mr. Kapah says the L.J.D Aire that will be commercially available in the third quarter of this year after giving the U.S. Government first priority and production consideration. Mr. Kapah goes on to remark that “the Aire symbolizes Larry Dickson’s commitment to innovation and market leadership.”

ArmorSource LLC, a leading manufacturer of ballistic helmets and head protection systems located in Hebron, Ohio USA, is an internationally recognized developer and manufacturer of bullet-resistant fragmentation and advanced ballistic head protection and accessories.
