

THE MULTI-TOOL JUST GOT A REALITY CHECK – ADDITION TO FAMILY: THE TACTICAL BLACK

PRODUCT OVERVIEW

The Center-Drive. Gerber's new multi-tool offers uncompromising performance through revolutionary design. The innovative center-axis driver opens to align like a real screw driver, yielding maximum torque and rotation. No productivity is sacrificed with the addition of a 30% larger outboard blade and one-thumb opening sliding jaws. Full size, real tools - the multi-tool just got a reality check.

Screw Conventional Thinking.

It seems so obvious – but until now no multi-tool has ever offered a full-size driver on the center axis with a standard bit. The result is all the ergonomics and torque you'd expect from the real thing, ready at the flick of a thumb.

Cut the B.S.

Get right down to business. A single flick of the thumb gets you access to a full-size outboard knife that is 30% larger than the competition. Don't worry; reverse thumb support gets the job done in confidence. No compromises – in no time.

Bend it to Your Will.

Adjust to your environment, or force it to adjust to you. It's your choice. One-thumb opening sliding jaws deliver instant command of the spring-loaded pliers, so you can take control of whatever's at hand.

"This has everything I need, and nothing I don't."

Alicia Elfving

Gerber Badassador | Motorcyclist, Photographer, Journalist

"It's handier than hell – it's a full bit not a three-sided one. The Center-Drive works like a real tool."
