

Plegium®

Smart Personal Safety

Plegium® was founded in Stockholm in 2016 with the aim to transform the personal safety industry. We develop and manufacture the next generation of advanced personal safety products for the mass market in our own factory 150 km northwest of Stockholm. We combine pepper spray with a personal alarm, a strobe light, and connectivity to the user's smartphone for remote emergency calls - and all happens at the press of the pepper spray trigger button. Through in-house development and manufacturing we have managed to make products that will be the new global standard for protection against assault. Welcome to the future of personal safety - available today!

Our first two products, launching and available for ordering at IWA 2018 are:

The Plegium® Smart Pepper Spray, which is a combined pepper spray, personal alarm and strobe light. On top of that it has connectivity to the user's smart phone for automatic remote emergency calls - and all is triggered when the pepper spray is fired. It radically improves your chances of avoiding assault. By custom design of all components we have managed to fit all of this function in a form factor that you can carry with you every day.

The Plegium® Combo Pepper Spray is a combined pepper spray, personal alarm and strobe light. It radically improves your chances of avoiding assault. By custom design of all components we have managed to fit all of this function in a form factor that you can carry with you every day.

Welcome to visit us in hall 8, booth 312! 🔥
