

Low price for quality products

Hunting camera leading enterprise Boly Inc. masters the core technology of image capturing speed and image processing.

Now this technology is applied to a low-priced mini compact trail camera BG330. With a very competitive price, BG330 has most of the attractive functions: less than 1 second trigger time, 65ft detection and 70 ft lighting range at night.

This is the first time for Boly Inc. stepping into the low-priced outdoor trailing market. Now buyers in this section will have a better choice. (Hall 6-143)
