

# Styrka Binoculars:

From Dawn to Dusk, Quality Glass for Hunters

---

No matter what you are hunting, scouting for or just trying to get a good, clear look at, Styrka has a binocular for you--and one to hold up to most anything Mother Nature can throw your way.

Styrka's top-of-the-line S9 Binoculars were created especially for hunters who need to see what's moving in the shadows at dawn and dusk--and all the hours in between. The S9's feature extra-low dispersion objective lenses on the three models (8x42, 10x42, and 15x56) that virtually eliminate chromatic aberration, plus high-grade SK-15 prisms for increased brightness and contrast.

Extra-low dispersion glass is also standard on the S7 line, and these fully multi-coated lenses produce razor sharp images and great color contrast, even in low light. The S7 offerings include the lightweight, compact 8x30 model, the versatile 8x42's, and the larger 10x42's for hunters glassing at longer distances.

The S5 line up features BaK-4 Prisms, with advanced phase and dielectric coating that dramatically increasing light transmission for bright, high-contrast images--at hundreds of dollars less than binoculars of comparable quality. The S5's are available in 8x32, 8x42 and 10x42 configurations.

The budget-friendly S3 binoculars still offer all the quality features that make them Styrkas. The S3 series are available in 8x42 and 10x42 models. All lens

surfaces are coated multiple times utilizing Styrka's proprietary SXL anti-reflective coatings for maximum brightness and superior image contrast.

All Styrka binoculars are made for hard use in the field, too. They are 100 percent waterproof and submersion tested for 30 minutes in 1 meter (3.3 feet) of water, are nitrogen purged to prevent internal fogging, and are coated in a tough, rubber armor for durable, no-slip protection.

Like all Styrka optics, the S9, S7, S5 and S3 Binoculars are all covered by the "Styrka Pride" warranty. If you ever have a problem with your Styrka binocular, your optic will be fixed or replaced. Forever. Plus, once a year, you can send back your binoculars (or other Styrka optics) and the company will clean and tune them as needed, all on Styrka's tab.
