

# There's A Styrka Rifle Scope For Every Hunter and For Every Hunt

---

With nearly two dozen scope models, in three separate product lines, Styrka has the scope just right for you and your hunting needs.

The top-of-the-line Styrka S7 Series Riflescopes feature Styrka's proprietary SXL-MAX multi-coating for increased light transmission-better light enhances the contrast and resolution for sharper, more detailed images. Constructed of one-piece, 30mm aircraft-grade aluminum for long-lasting durability.

The S7 Series scopes also feature a side-focus parallax adjustment-so you can make fast adjustments while in the shooting position-and ultra-precise  $\frac{1}{4}$ -inch MOA clicks for windage and elevation adjustments. Select S7's have illuminated reticles for quick target acquisition in low light.

Built around a one-piece, 1-inch aircraft-grade aluminum tube for structural integrity and durability, the Styrka S5 Riflescopes feature our proprietary SXL anti-reflective coatings on all lens surfaces. These coatings help produce maximum brightness and optimal color, sharpness and image contrast. Select S5 Series scopes have a side parallax adjustment. All S5's have blackened lens edges to block stray light for reduced reflection and glare.

While they are more budget-friendly, Styrka S3 Riflescopes have all the features you'd expect from a high-quality Styrka optic. Made with tough, durable 1-inch 6061-T6 aircraft-grade aluminum tubes, S3's have SLX anti-reflective coatings on all lens surfaces. Select models of S3's have BDC reticles and a side-parallax adjustment.

All Styrka rifle scopes are made for hard use in the field, too. They are 100 percent waterproof and submersion tested for 30 minutes in 1 meter (3.3 feet) of water, and are nitrogen purged to prevent internal fogging.

Like all Styrka optics, the S7, S5 and S3 Rifle Scopes are covered by the "Styrka Pride" warranty. If you ever have a problem with it, your Styrka scope will be fixed or replaced. Forever. Plus, once a year, you can send back your scope (and other Styrka optics) and the company will clean and tune it as needed, all on Styrka's tab.

*Launched in 2015, Styrka offers a dynamic line up of hunting scopes, binoculars, red dots and spotting scopes. The Styrka philosophy is simple but non-negotiable: make high quality optics at affordable prices; always tell your customers the truth about what optics can and can't do; and, stand behind your products 100-percent, forever. Styrka Pride. Styrka Strong.*
