

## Styrka Recognized for High Quality and Value by Petersen's Hunting

---

Styrka's S5 rifle scope was selected as an "Editor's Choice" for the November 2017 issue of Petersen's Hunting, one of the country's most respected hunting publications.

Petersen's Editor David Draper complimented the Styrka S5 SH-BDC 3-9X40 on its handy side focus wheel "that adjusts parallax from 10 yards to infinity and a [quality] ballistic drop reticle...Inside the one-piece aluminum tube, fully multicoated optics are bright and clear." The S5's versatility as a hunting optic, he noted, "gives budget-conscious hunters aiming solutions at extended ranges up to 600 yards."

Draper added that the Styrka S5 is not only effective afield, but provides hunters with top-end features "without breaking the bank."

"Everyone at Styrka was truly honored our S5 was selected as an Editor's Choice optic by Petersen's Hunting," said Brad Gross, Styrka's national sales manager. "The whole staff works very hard every day to maintain our quality standards and to produce optics that get the job done for hunters--at prices hunters can afford. Being recognized for our efforts by a superior hunting publication like Petersen's means a great deal to all of us."

Whether it's long-distance, up close or anything in between, Styrka has hunters and other outdoor enthusiasts covered with binoculars, scopes and red dots made for the rigors of the field.

All Styrka optics are covered by the "Styrka Pride" warranty. If you ever have a problem, your Styrka optics will be fixed or replaced. Forever. Plus, once a year, you can send back your optics and the company will clean and tune them as needed, all on Styrka's tab.
