

Conceived for the small-game hunter and pest controller, the shape, weight and internal design and balance of the three models deliver its best performance with magnum air rifles.

The **Domed** is an all-round model with excellent aerodynamics and energy retention at long distances, providing the necessary impact for its mission.

The **Hollow-Point** will deliver a great expansion when impacting at short-medium ranges with devastating effects on the target.

The **Jumbo Extra Heavy** pointed tip aims for maximum penetration while the extra heavy weight keeps velocity under control for better accuracy.

Carefully manufactured with German technology and a special lead alloy, a strict quality control is performed with state-of-the-art machinery before the final visual inspection and manual selection is implemented.

Available in calibers 4,5mm (.177) and 5,5mm (.22) the pellets are conveniently packed in a screw-cap tin internally coated with epoxy for additional protection against lead oxide.

DOMED
.177 (8GR) & .22 (15GR)

HOLLOW POINT
.177 (8,7GR) & .22 (15GR)

JUMBO EXTRA HEAVY
.177(10GR) & .22(20GR)
