

Ultrapoint PRO

Complete mobile application for hunters

Ultrapoint PRO is safe, reliable and easy to use mobile application. Thanks to its simple interface and versatile features, the application is ideal for localizing Ultracom Novus and Ultracom Avius dog tracking devices and for exploring the terrain. With Ultracom PRO the main users can control Ultracom GPS devices.

- Own position and route
- Locate other hunters and named dogs using Ultracom tracking collars
- Waypoints marking
- Measuring tool
- Bark counter with colour indicator
- Geofencing, bark and standing alarms
- Adjustable alarm limits
- Location follow-up also with PC/Mac
- Chat function

Ultracom Pro application includes the following maps (availability depends also on mobile operating system):

- Finland, Sweden, Norway, Estonia and France terrain maps from the national land survey
- ESRI, HERE global terrain maps
- Google satellite maps

Ultrapoint PRO application is available for Apple iOS and Android smart phones and tablets. Application license can be transferred to another phone and phone number.
