

# Start Winnng Matches With The DVC Steel Pistol From STI

The new DVC Steel 2011© Pistol delivers the same performance as the DVC Open Pistol without the requirement of major power factor ammunition allowing for the use of standard 9mm or .38 Super rounds.

The DVC 2011© Steel Pistol is built slightly shorter than the DVC Open Pistol for faster target transitions helping shooters improve their scores. The gun has a DLC hard chrome finish that will not only provide great looks, but also corrosion resistance for hundreds of thousands of rounds. The 4.15" barrel (plus compensator) is TiN coated to provide long lasting fit and enhanced lubricity. The gun features the DVC stippled grip, oversized magwell, extended magazines and the Recoil Master dual spring system.

The DVC Steel has a 20 round capacity with both 9mm and .38 Super ammunition. With a 2.5lb trigger pull, front & rear slide lightening cuts, Recoil Master dual spring system, C-More 6-MOA sights and the new TX1 Compensator, the DVC Steel Pistol will have competitors winning steel matches in no time.

The new DVC Steel Pistol from STI International sells for \$3,999.
