# PX-S2000™

Shoot with 100%  
confidence, never miss a  
shot due to misalignment

The PX-S2000 has a state of the art parallax free lens that together with our patented fiberoptic system creates a sight system that will give the shooter full confidence that the shot will hit 100%.

The sight is made of anodized aerospace aluminum and all components are waterproof. The fiber optics that we use in all our sights will perform excellent in the deepest forest and well after and before legal hunting hours at dusk or dawn.

The patented fiberoptic sight system is totally self contained and uses the ambient light to generate the glow. It's a system that use:

- No LEDs
- No wiring
- No batteries
- No switches
- No electrical components that can fail to work in the very moment of your best shot.

Total weight is 50 gram. Fits any flat rib from 5.0–12.0 mm width.

Glass mirror for safe and easy cleaning. Fiberoptic will last for a 100 years under normal use.

Different symbols are available.

**The PX-S2000 is manufactured under US Utility patent 6,085,427 and foreign patents.**
