

INERTIA PLUS – Unstopable Bolt System

The Masai Mara is a lightweight high performance semi-automatic recoil driven shotgun based on the design by Bruno Civolani. It has been engineered for precision handling and maximum performance with aesthetics influenced by modern aerodynamic design.

The Masai Mara features Retay's proprietary Inertia Plus System™, the world's most advanced kinetic energy driven shotgun action.

The Retay Inertia Plus System™ is capable of cycling lightweight 7/8oz. shotgun shell loads as well as heavy hunting loads and eliminates misfires by ensuring the system's rotating bolt locks into the chamber under all conditions while at the same time preventing unintended disengagement.

Retay Inertia Plus System™, the world's most highly refined kinetic energy driven shotgun action. The Inertia Plus features a high polished or black anodized bolt engraved with Inertia Plus System and an oversized charging handle and bolt release.
