Aimpoint announces the launch of a Micro H-2 sight with dedicated mounting solution for London gunmaker John Rigby & Co

Malmö – Aimpoint, the originator and worldwide leader in red dot sighting technology, has announced the launch of a Micro H-2 sight with a dedicated mounting solution for London gunmaker Rigby's new Highland Stalker rifle, offering driven shooting fans a technical yet refined solution for the hunting fields of Europe.

John Rigby & Co wants Rigby adventurers to be assured no matter the conditions this red dot sight will not let them down. This is the reason why they put their trust into Aimpoint® products.

The Aimpoint® Micro H-2 sight has become the worldwide standard for compact reflex sights and is the most popular sight in the Aimpoint's portfolio. Hunters and sport shooters have embraced this sight for its compact size, durability, and extremely long battery life.

Therefore, it came all naturally to choose that sight for the Highland Stalker rifle. The Rigby Aimpoint® Micro H-2 is embossed with the iconic Rigby 'double R' logo and has an integrated purpose engineered single-piece mount which fits the popular quick release Hexalock bases.

The Micro H-2 and mount comes presented in a beautiful hand stitched brown leather pouch. Available exclusively from www.johnrigbyandco.com.

For more information on the Rigby Aimpoint® Micro H-2 sight please check www.johnrigbyandco.com. For other Aimpoint® products, please visit our webpage at aimpoint.com or contact:
