FLIR Announces European Availability of Breach Compact Thermal Imaging Monocular And Multiple Night Vision Products

New Products for Hunters and Tactical Professionals Will Debut at IWA Outdoor Classic

WILSONVILLE, OR – March 7, 2018 – FLIR Systems, Inc. (NASDAQ: FLIR) announced the FLIR Breach™ multifunctional thermal imaging monocular and two new night vision product families are available now to order through established FLIR dealers. All products will make their European debut during IWA Outdoor Classic in Nuremberg, Germany. These new cameras help broaden FLIR's leadership position in the tactical and outdoor markets and builds on its nearly 50-year heritage of developing combat-proven solutions.

The [FLIR Breach](#) multifunctional thermal monocular is FLIR's lightest, most compact, full-featured 320x240 thermal monocular. Powered by FLIR's 12-micron high-performance Boson™ thermal core, the Breach delivers crisp images on a high-definition display, and offers recording and internal storage of up to 2,5 hours of video and 1.000 still images. In addition, it includes a digital compass, inclinometer and seven color palette options for enhancing the imaging experience. Weighing only 210 grams, it can be concealed in a pocket or mounted to a helmet.

FLIR is also expanding its Armasight™ by FLIR night vision lineup with new tactical monocular and binocular families. Each family features Generation 2 technology and multiple lens configurations, including an upgraded 19mm lens that offers a 51-degree field-of-view for 25 percent more viewing area. Additional common features for all models include manual gain control, up to 40 hours of run time from a single AA alkaline or CR123 battery, and hand, weapon or helmet mounted options. Also, the units feature a flip-up-turn-off, flip-down-turn-on design when mounted to a helmet.

- [Armasight by FLIR MNVD](#) single-tube monocular offers a lighter weight option and preserves night adaptation in the unaided eye.
- [Armasight by FLIR BNVD](#) dual-tube binocular provides better depth perception and situational awareness for improved navigation.

"We're thrilled to offer our European customers an innovative, reliable thermal product in a smaller, lighter form factor," said Dmitry Rocklin, Vice President of FLIR Outdoor and Tactical Systems (OTS). "The suite of night vision products offers exceptional field-of-view, flexible mounting, and improved run times, providing users with market-leading image quality, size, weight, battery stamina and features."

FLIR Systems will showcase the new products at IWA Outdoor Classic (9-12 March) Hall 3A / Stand # 400a. Product orders can be placed through established FLIR outdoor and tactical dealers, with shipment on May 1, 2018.
