

## Lansky Sharpeners Introduces the C-Sharp

Lansky Sharpeners, the most recognized name in knife sharpening worldwide, continues to expand its line of easy-to-use sharpeners with the release of the C-Sharp.

Modeled after Lansky's top-selling QuadSharp, the C-Sharp is a portable all-ceramic sharpener that allows users to maintain their blades to the exact angles they set with their Controlled-angle Systems or Turn Boxes.

The C-Sharp features four sharpening angles (17°, 20°, 25°, and 30°) in 600 grit ceramic. It also has an 800 grit fine ceramic benchstone that can be used for polishing straight or serrated blades. Perfect as a Lansky System accessory, or as a stand-alone sharpening solution, the C-Sharp offers the same great features as the QuadSharp, in an all-ceramic option.

"The C-Sharp is the first all-ceramic pocket sharpener to offer four different sharpening angles," said Deanna DiLorenzo, Lansky Sharpeners' Marketing

Manager. “We wanted to give our customers another abrasive option, while still offering a design they loved.”

Turn Box users will find the C-Sharp a handy, portable option that allows them to maintain their 20- or 25-degree angles using the same 600 grit ceramic they’re accustomed to. Used as a stand-alone system, or as an accessory to a Lansky kit, the C-Sharp offers all users a quick and simple sharpening solution to maintain their blades at home or on the go.

**Features:**

- 4 sharpening angles (17°, 20°, 25°, and 30°)
