STEYR BREEZE

Perfect sound suppression with optimized blast characteristics combined with ideal weight distribution for maximum guidance – all with the accuracy only provided by the cold-hammer-forged barrels from STEYR ARMS.

The new STEYR BREEZE models are available as SM12 and CL II with wooden stock or weight-reduced FBT-carbon-stock.

The STEYR BREEZE is an integrated silencer weapon on basis of SM12/CL II and SM12 Carbon/CL II Carbon. It has an 407mm stainless barrel and an integrated carbon suppressor.

The weight of the STEYR BREEZE is about 3,4kg and of the STEYR BREEZE Carbon 3,05kg. The overall length of the STEYR BREEZE is 1170mm and of the STEYR BREEZE Carbon 1150mm.

Average Sound Suppression: 24,5 dB (A)

The STEYR BREEZE is available in the calibers .308 Win. and 6,5 Creedmoor.

STEYR BREEZER

SMALLER – LIGHTER – MORE SILENT

Under this motto STEYR ARMS presents a new line of suppressors.

The newly developed suppressors create these best performances by using the so-called „virtual volume“, a new technology that puts STEYR ARMS from zero to the top in the segment of sound suppressors.

The STEYR BREEZER is available in 2 models as a muzzle suppressor device (STEYR BREEZER MSD) and as an overbarrel suppressor device (STEYR BREEZER OSD).

STEYR BREEZER MSD muzzle suppressor device

Length: 207mm (added length: 192mm)
Diameter: 45mm
Weight: 400g

Average Sound Suppression:
28 dB(A) 1m right of the muzzle
27 dB(A) by the shooter's ear

Suggested Retail Price € 390,-

STEYR BREEZER OSD overbarrel suppressor device

Length: 228mm (added length: 146mm)
Diameter: 45mm
Weight: 400g

Average Sound Suppression:
31 dB(A) 1m right of the muzzle
30 dB(A) by the shooter's ear

Suggested Retail Price € 440,-
