M1A2 Shot timer

Shot timer is professional devices which used to record shooters' shooting results, can measure the time. it takes you to make individual shots or a string of shots. Even though these devices are more often used in competitions, you can use them with good results to improve your shooting skills. M1A2 Shot timer was independently developed by *indesign*. It is the latest shot timer in the world which different from the former shot timers, mainly reflected in the following points.

1.Three in one function Shot timer.

It can be used for both real firearms and airsoft guns as well as

stop watches.

For real firearms

For airsoft

For stop watch

The M1A2　shot timer was used in all 30 stages of the **IPSC Action Air World Shooting Championship 2018.** It accurately recorded the results of the competition for more than 600 players from 18 countries and regions.

The M1A2 shot timer will also be used in all 20 stage of **2018 TPSA LEVEL III ACTION AIR CHAMPIONSHIP**, which will once again accurately record the results of the competition for players from various countries and regions. Registration

entrance
