

PRESS RELEASE

WALTHER Introduces Increased Performance:

The All New Q5 Match Steel Frame

Q5 Match Steel Frame

Q5 Match Steel Frame Champion

Carl Walther GmbH is proud to offer the highest level of Quality and Precision on the market with the Q5 Match Steel frame.

Combining the industry leading PPQ Quick-Defense Trigger, superior accuracy, and unmatched ergonomics found in the popular Q5 Match model, while adding in a high-quality precision-machined frame, the Q5 Match Steel Frame has raised the bar in pistol performance. The pistol comes standard with LPA Fiber Optic front sight, LPA Adjustable rear sight, and optic mounting plates to accommodate most micro red-dot optics available. The Q5 Match Steel frame will initially be available in two models: the Q5 Match Steel Frame model with three fifteen-round magazines, and the Q5 Match Steel Frame Champion model with new WALTHER Performance accessories including a low-profile magwell and aluminum magazine extensions that increase the capacity to 17 rounds.

“WALTHER’s goal was to take our existing high-performance PPQ, the Q5 Match, and push the boundaries of performance further than anything offered on the market,” said Bret Vorhees, Director of Product Development for Walther Arms. “The Q5 Match Steel Frame exceeds all expectations in terms of performance, quality, and attention to detail. This new product line shows what WALTHER is really capable of, and it’s just the beginning.”

MSRP for the Q5 Match Steel Frame starts at €1,699.00 and are available for purchase immediately.

Coming up January 21st: For more information on the WALTHER Q5 Match Steel Frame product line, visit
