Press release Gletcher HPAir 223-6

SMG Inc., USA, represented in Europe by Soldier of Fortune GmbH, is proud to present a new line of premium airsoft PCP guns, that operate on HPA. The new HPAir 223-6 provides constant energy of 1,6 joule. HPA offers various advantages to conventional gas-operated or S-AEG systems: Besides it's temperature-independent capabilities, HPA is very reliable, low-wear and low-maintenance.

The gun has a full-length picatinny rail, metal front and rear sight, a collapsible stock and is ready to be modified with standard AR-15 accessories. On customer request individual laser engraving is possible.

Specifications

caliber: 6 mm BB
barrel length: 275 mm
length: 780-880 mm
weight: 2,88 kg
Each gun comes with a hi-cap metal magazin.

With this development SMG Inc. expands it's Gletcher Airgun range into the realm of modern military style weapons. The HPAir 223-6 targets customers that appreciate well-engineered top-quality gear for the best experience in the field.

The regular HPAir 223-6 will be accompanied by a CQB variant, as well as several DMAir models with barrel length up to 20 inch.
