

## NEMESIS 6.0 GTX®

### CATEGORY: Tactical

The **NEMESIS** range has been created to meet the tactical demands that require quick reactions and agility. **NEMESIS 6.0 GTX®** is a 6-inch high boot, specifically designed for those looking for more protection on the ankle. Lightness is a defining characteristic of the Nemesis range, providing facilitated mobility and ease at every move.

The upper made of **Lenzi Perspair** guarantees an extraordinary resistance to abrasion. Lenzi Perspair is in fact a particular fabric made of high tenacity polyamide fibers interwoven using Combo Technology. This system bonds fibers together in order to obtain the maximum mechanical resistance. The result? A highly breathable and lightweight fabric with extra abrasion-resistant properties.

NEMESIS 6.0 GTX also features two particular Garmont® technologies, coupled to deliver maximum comfort all day long. The **erGo-last**, with its rounded and smooth contours, follows more closely the shape of the foot for a more comfortable ergonomic fit, while the **Double Damper** technology ensures superior shock absorption thanks to its peculiar two-part system. In the Double Damper, a midsole dampening ground impact is paired with an internal shock absorber reducing heel impact. The result of such system is reduced fatigue, significantly increased comfort and greater stability.

The **Vibram® Extended Sole** adds further protection during action and provides more grip on every ground.

The **GORE-TEX® Extended Comfort** lining optimizes climate comfort in warmer conditions and during high-level activities either outdoor or indoor, ensuring at the same time waterproof performance combined with great breathability.

Part of the Nemesis family is also the 4-inch high model **NEMESIS 4.0 GTX**.

## **Nemesis 6.0 GTX**

Upper: Lenzi Perspair

Lining: GORE-TEX® Extended Comfort

Footbed: PU

Weight: 515 gr (1/2 pair size 8 UK)

Size Range: 3-13UK, including half sizes

Colors: Black, Coyote
