

NEMESIS 4.0

CATEGORY: Tactical

NEMESIS 4.0 is the ideal footwear for missions requiring speed and agility, combining exceptional lightness with protection, therefore facilitating mobility in every kind of action.

The 4-inch high upper made of **Lenzi Perspair** guarantees extraordinary abrasion resistance. This particular fabric is based on a Combo Technology, presenting interwoven high tenacity polyamide fibers. Such system bonds fibers together in order to obtain the maximum mechanical resistance, resulting in a highly breathable and lightweight fabric with extra abrasion-resistant quality.

NEMESIS 4.0 features also two **Garmont® DNA technologies**, working together to ensure the best comfort all day long. Garmont's **erGo-last**, characterized by its rounded and smooth contours, is able to follow more closely the shape of the foot, offering a more comfortable ergonomic fit. This feature is paired with the **Double Damper** technology, which aims at ensuring superior shock absorption thanks to its peculiar two-part system: a midsole which dampens ground impact, and an internal shock absorber which reduces heel impact. The combined effect of the two parts is enhanced cushioning and less fatigue, producing greater comfort and stability overall.

The **Vibram® Extended Sole** adds more protection while providing superior grip on every terrain.

Also part of the NEMESIS family is the NEMESIS 6.0 GTX® model: a 6-inch high boot designed to ensure more protection on the ankle, but still very light.

Nemesis 4.0

Upper: Lenzi Perspair

Lining: mesh

Footbed: PU

Weight: 480 gr (1/2 pair size 8 UK)

Size Range: 3-13UK, including half sizes

Colors: Coyote
