## Press release

January 2020

### **NEW: Leica PRS 5-30x56i riflescope For optimum performance in long-range shooting**

With the new Leica PRS 5-30x56i, Leica Sport Optics (Wetzlar, Germany) presents a top-class riflescope for long-range sport shooting – in a perfect design. Its magnification range of 5x to 30x offers a wide array of uses – from long-range target shooting to competitions over extreme distances and under the most difficult conditions.

The shooter can concentrate fully on the target: High light transmission of over 90% masters even challenging light conditions. The large adjustment range of the reticle in the first focal plane is ideal for the longest distances. The Leica PRS 5-30x56i is equipped with a 6x zoom, which allows flexible use at various ranges.

Tool-free zeroing of the turrets ensures fast and flexible operation under extreme conditions. Thanks to the “zero stop” function, shooters can quickly and easily adjust the Leica PRS 5-30x56i to their individual requirements, using the on-board tool. Its functional design is geared to the particular needs of long-range shooters: Extremely rugged and uncompromisingly made of high-quality aluminum, allowing intuitive and safe handling in any shot situation.

The new Leica PRS 5-30x56i long-range riflescope is available as a ring variant with three reticles: a classic L-4a reticle, a ballistic reticle with hold marks, and a special PRB reticle for precision rifle shooting. The center tube diameter is 34mm, and all models have reticle illumination. The sun visor and the screw-in throw lever are included in the scope of delivery.

“The new PRS 5-30x56i is the choice for long range shooting. Pure design, user-friendly handling and intuitive pleasure of the crystal-clear optics result in the essential rifle scope,” explains Ferdinand Mogwitz, Product Manager Leica Hunting Optics.

### **The benefits at a glance**

- 6x zoom (5-30x) for flexible use in long-range sport shooting and competitions
- >100 MOA adjustment range of the reticle in the first focal plane
- Tool-free zeroing of the turret scales, on-board tool for “zero stop”
- Extremely rugged, high-quality workmanship for safe handling
- Zero stop can be activated or deactivated, and set individually (tool in windage turret)
- With multi-turn rapid reticle adjustment BDC (Bullet Drop Compensator)
- Outstanding optics

### **Models and recommended retail prices (incl. VAT)**

51100 - Leica PRS 5-30x56i (L-4a reticle)	€ 2,700,00
51200 - Leica PRS 5-30x56i (L-Ballistic reticle)	€ 2,700,00
51300 - Leica PRS 5-30x56i (L-PRB reticle)	€ 2,700,00

The new Leica PRS 5-30x56i riflescope will be available from January 2020 (recommended retail prices).
