T4 Tour GTX®

Category: TACTICAL

T4 Tour GTX® is particularly designed for on-off duty activities requiring speed and agility. This light boot ensures ease of movement on trails as well as in urban environment, offering a prompt response for every need.

The upper made of nylon and microfiber and is combined with the **GORE-TEX® Extended Comfort** lining. This lining offers optimized climate comfort in warmer conditions and during high-level activities, either indoor or outdoor, while also securing durable waterproof protection and great breathability.

Garmont®'s own **G-Heel technology** provides for postural stability, as the PU structure surrounding the back area holds the heel without constraint, ensuring flexibility and upper protections from impact wear at the same time.

The high-cut design works in the same direction, offering ankle support with no compromises in terms of agility and ease of movement.

The **Vibram® Trek Buff sole**, characterized by its small squared lugs pattern for multi-point traction, provides enhanced grip and traction as well as durability.
