

## **SAVAGE** ads 3 new hot new calibers to different lines

**6mm ARC** – (CIP approval expected soon) initially developed to lift the ballistic performance of AR15 rifles to the next level, it also gets a lot interest as a short barrel / low recoil hunting load and low recoil long range target round. Savage ads two new bolt action rifles in this caliber.

**110 Tactical** – 18"/46 cm barrel, AccuTrigger, AccuFit, AccuStock, AICS magazine, 20 MOA EGW rail, 5/8x24 muzzle thread [Watch the Video](#)

**110 Axis** – 22"/56 cm barrel, AccuTrigger

**300 PRC** - (CIP approved) combines heavy .30 caliber bullets with non-belted cases and temperature-stable powders. The 300 PRC's projectiles achieve repeatable accuracy thanks to their high ballistic coefficients. The 30-degree shoulder of its case ensures stable chamber alignment, while its non-belted cases stack easily and feed reliably from magazines.

Savage is now building rifles that make the most of 300 PRC's speed and efficiency. Each rifle has thread-in headspacing, a floating bolt head, and a button rifled barrel. With the stability of AccuStock and the precision of Savage's AccuTrigger, the 300 PRC's potential is fully realized.

**SAVAGE 110 LONG RANGE HUNTER**

**SAVAGE 110 HS PRECISION**

**SAVAGE 110 PRECISION**

**SAVAGE 110 ELITE PRECISION**

**FEATURES:** Variety of proven platforms chambered for 300 PRC. User-adjustable AccuTrigger Button-rifled barrels. Detachable AICS Magazine. Thread-in barrel headspacing. 1-Piece 20 MOA Rail. Serrated lock nut
