Spyderco's revolutionary Salt 2 LC200N series of knives combines all the proven features of their iconic Delica® 4 Lightweight platform with the superior corrosion resistance and edge-holding properties of LC200N blade steel. For users who prefer the versatility of a traditional Wharncliffe blade, the Salt 2 LC200N is now also available with that classic blade profile. Available with a choice of a PlainEdge™ or fully serrated SpyderEdge™, its perfectly straight edge and full-flat grind offer everything from extreme cutting power to scalpel-like precision. The blade features a fully accessible Trademark Round Hole™ for swift, one-handed opening with either hand and is paired with a lightweight, linerless handle injection molded from vibrant green fiberglass-reinforced nylon (FRN). The handle's highly refined ergonomics and high-traction Bi-Directional Texturing™ ensure a secure grip in even the most demanding conditions, and its stout back lock mechanism and fully configurable four-position pocket clip make every aspect of its carry and operation completely ambidextrous.
