

< PRESS RELEASE >

Silky launches the ultimate outdoor saw

Silky saws are known as the best handsaws in the world. Folding saws are especially suitable for outdoor purposes. They are compact, lightweight and like all Silky saws: razor-sharp!

Now Silky has released a special series of the 3 best folding saws for bushcrafters and hunters. In this Outback Series you will find a Bigboy, Gomboy and Pocketboy. In addition to the standard Silky features, these Outback saws have a black coating and an arbor composite grip.

So what makes these tools so unique? First of all, Silky has more than 100 years of experience in making handsaws, using the most advanced techniques and the finest Japanese steel. The unrivalled knowledge of metalworking ensures a unique combination of wear resistance and flexibility of the saw blade.

Besides, the saw teeth are cut out by laser with extreme precision. Because the teeth saw on the pull stroke, you can cut smoothly and quickly without using lots of energy. The saws in the Outback Series all have an extra thick blade. Anyway, always use a pull saw as it should and do not force the push stroke.

The Outback Edition is exclusively available through specialized distributors in Europe. Find out your ultimate saw on: www.silky-europe.com/outback

Pocketboy - Gomboy Curve - Bigboy 2000

Note for editors

De Wild BV is the exclusive European importer of Silky saws from Japan. In addition, our family business imports the high-quality Japanese secateurs from Okatsune, and we have an extensive range of garden and park machines under our own brand name GTM Professional.
