

Tasmanian Tiger - The 2022 Program

For the 2022 season, Tasmanian Tiger is presenting a modular "soft" load carrier for various applications. In addition, the collection will be expanded with three mission backpacks and flexible-use daypacks. A padded, modular insert for backpacks, two new shoulder bags and various special tactical bags complete the new program.

"Soft" Load Carrier With Complementary Modules

The **TT Base Carrier** features a high-performance backpack carrying system with a three-dimensionally shaped, removable hip belt. The carrier platform features a MOLLE system as well as numerous loops for attachment, The **TT Base Carrier Flap** and the **TT Front Side Pouch 16 Set** are available as perfectly fitting supplementary modules. In addition, the carrier platform can be supplemented with the large **TT Base Carrier Pack** to create a full-fledged backpack (55l).

New Mission Backpacks

The **TT Mil Ops Pack 80+24** with its high-performance V2 carrying system is designed to carry heavy loads. The toploader offers a separate bottom compartment, side pockets, a height-adjustable lid with lid compartment and a MOLLE system on the front and sides.

The rugged daypack **TT Mil Ops Pack 30** has a MOLLE system as well as bungee cord on the front, and it features side pockets and a lid with lid compartment. The backpack can be reduced in volume using the compression straps. The waist belt is removable.

Tasmanian Tiger introduces, with the **TT Base Pack 52**, a customizable basic mission backpack that can be used for many scenarios. It has a volume of 52 liters and is expandable to 65 liters. The lid and hip belt can be removed. Due to a roll closure (snow guard) the backpack can be used without any restrictions even without the lid.

Daypacks For Different Applications

The **TT Sentinel** is made for carrying light or bulky gear. It is available in 28 or 40 liter capacities. The daypack features two full wrap-around compression straps and a zippered roll-top closure with two locking positions. A MOLLE hook-and-loop panel inside allows for customization and organization with accessory pouches.

The sleek, understated **TT Companion** with Thermo Mold Back System offers 30 liters of volume. The toploader has a large MOLLE hook-and-loop panel inside for individual customization, and the pack can be reduced in volume with internal compression straps. The main compartment is lockable. The backpack also has the option of fixing a waist belt.

Padded Insert With Flexible Dividers

The **TT Multipurpose Equipment Insert** is used to transport sensitive electronics, for example camera equipment. It is designed as an inner bag for backpacks, for example, the TT Modular Pack 45, but can also be used separately. In addition to flexible dividers, it features transparent mesh interior compartments and an organizer. It offers both a full perimeter zipper and top access. The front cover can be removed.

Versatile Shoulder Bags

The all-around padded **TT Modular Equipment Case** is a versatile shoulder bag - it can serve i. e. as a gun bag, a gear bag or a camera bag. On the inside it is lined with a large MOLLE hook-and-loop panel and it features flexible-use, padded dividers. The separate, width-adjustable laptop compartment can also be used as a weapons compartment. The lid flap is secured with hook-and-loop and quick-release fasteners, and an extra zipper allows access from the top.

The **TT Shoulder Bag** scores with a civilian look and compressible volume. It has two lockable main compartments, one of which is padded, and a flat zippered front pocket. In both main compartments are MOLLE hook-and-loop panels for individual customization. The bag can be compressed using the buckles attached to the outside.
